

## LISTING OF CLAIMS

1. (Currently Amended) A drum plug and faucet wrench comprising:  
an elongated body having first and second opposite end portions with a bend located intermediate, each said end portion including at least one plug tool head attached and integral thereto ~~drive element for turning a drum plug~~; and  
at least one integral flange projecting from said body, said at least one flange including a plurality of open end wrench heads, each of said wrench heads being different in size from the other of said wrench heads and at least one of said plurality of open end wrenches is sized for turning a faucet and at least one other of said plurality of open end wrenches is sized for turning a drum ring bolt;  
wherein said bend is at an angle of about 140 degrees and each of said tool heads is attached to a respective end portion of said body at an angle of about 100 degrees relative to said end portion.
2. (Currently Amended) The wrench of claim 1, wherein said elongated body includes a central portion ~~having a~~ including said bend located in a plane, ~~and each said first and second end portions includes a plug tool head attached thereto~~, each said tool head having a pair of plug drive elements, each of said drive elements being different from the other of said drive elements.
3. Cancelled
4. Cancelled
5. (Original) The wrench of claim 4, wherein said angle of attachment of each of said tool heads is in said bend plane.
6. Cancelled

7. Cancelled

8. (Original) The wrench of claim 1, wherein said first end includes a drum plug tool head, and said second end defines a first drive element.

9. (Original) The wrench of claim 8, wherein said drum plug tool head includes second and third drive elements.

10. (Original) The wrench of claim 9, wherein said first drive element is different from said second drive element and said third drive element is different from said first and second drive elements.

11. (Original) The wrench of claim 9, wherein said plug tool head includes a fourth drive element different from said first, second, and third drive elements.

12. (Original) The wrench of claim 8, wherein said at least one flange includes a pair flanges disposed on opposite sides of said body, each said flange including an open end wrench head.

13. (Original) The wrench of claim 12, wherein one of said open end wrenches is sized for turning a faucet and the other is sized for turning a drum ring bolt.

14. (Original) The wrench of claim 8, wherein said first drive element is at an angle of about 119 degrees relative to said body.
